Your Request:

I am approaching my second year of my Trainee Nurse Associate course within a hospital setting, having passed first year, but I am looking to transfer to a primary care setting. I would love to complete my second year within primary care with a view of having a career in primary care once qualified as a Nurse Associate. I'm wondering if you could point me in the right direction of some contacts that would be willing to look into this further and perhaps start the process of moving settings?

Our Response:

NHS Cheshire & Merseyside ICB is not responsible for facilitating the transfer of trainee nurses to Primary Care settings and does not hold information on contacts to start the process of moving training settings. However, NHS Cheshire & Merseyside ICB understand that whilst training, trainee nurses may wish to see if there are opportunities to transfer training into a Primary Care setting via the Cheshire & Merseyside Training Hub, which can be accessed via the following link to their website: <https://www.cmthub.co.uk/>
